

Diego Armando Tejedor Cortés

Software developer focused on building attractive and accessible web application solutions.

Relevant Experience

Frontend Developer Jr · **GrupoR5** Dic 2020 – Mar 2023

- I built, designed, and deployed components for the company's website, based on UI designs to improve the user experience, using technologies such as JavaScript, React, CSS, and HTML.
- I integrated APIs with GraphQL to display new relevant information for web application users.
- I built reusable components using StoryBook technology, to import them into different web applications and maintain consistency in brand design.
- I refactored and implemented best development practices, focusing on clean and scalable code.
- I improved test coverage in web applications, which enhanced code quality and provided better control over deployments to development and production environments, using frameworks like Vitest and Jest, along with React Testing Library.
- I maintained and created new templates for transactional emails, using the Jinja programming language. These were implemented on the Sendwithus platform, optimizing digital marketing.

Developer · **Grupo Cubo** Jun 2019- Nov 2020

- Maintenance and update of the web application built in C# .NET Core, using SQL Server as the database.
- Design of graphical interfaces in Angular.
- Integration of applications with jQuery.
